1. Introduction

The overall objective of patient mobile app is to manage the patient data on mobile app. It starts with the registration of patient via login OTP. It allows the patient to book, reschedule and cancel appointment. It also manages the patient medical history including OPD history, lab result. Camp plan can be viewed and its location can be tracked online via mobile app. The app includes the functionality to add family member mapped with the same mobile number.

2. Brief Overview

2.1 Features

This module manages the following features:

- Registration of new user
- Login
- Display Personal information
- Book appointment
- Appointment status (including cancel and reschedule appointment)
- OPD History
- Lab result
- Add family member
- View camp plan
- Logout

2.2 Target Users

The following users can access the user management module:

1. Patient

3. Detailed requirement

3.1 Registration of new user

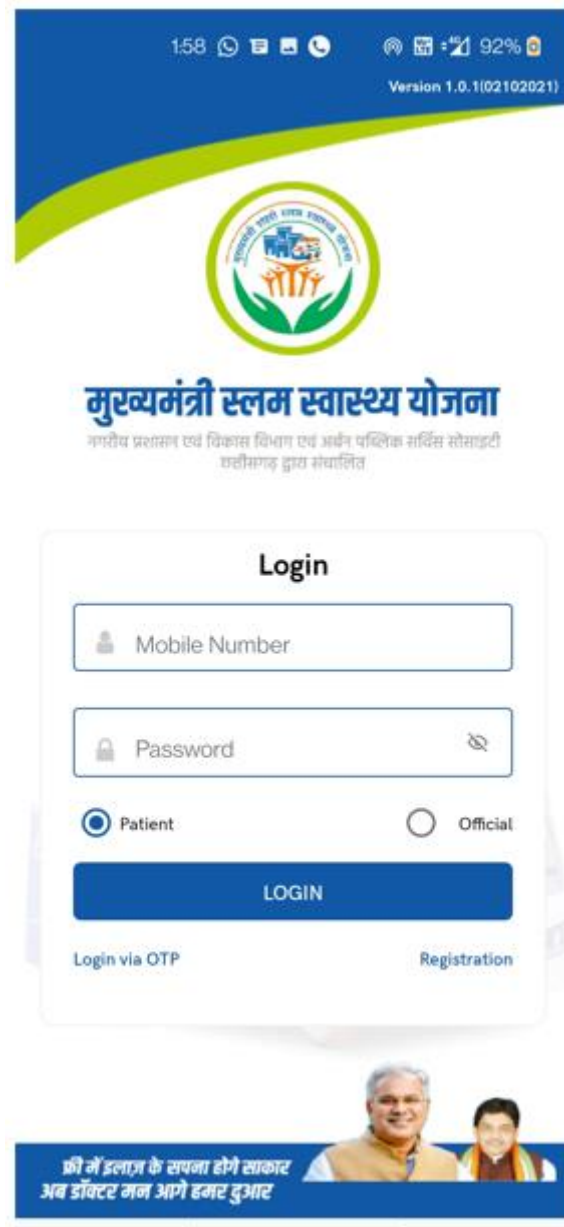

3.1.1 Description

This functionality allows the user to register new user in the app. The registration is one via OTP. Once the details of user is entered, OTP is generated. After verifying the OTP, the user is registered in the app.

3.1.2 Prerequisites

1. MMU app is installed on user mobile

3.1.3 Screenshot

3.1.4 Field Description

S. No	Field Name	Description
1	Name	It refers to the name of user who needs to be registered in app

2	Gender	It refers to the gender of the user
3	Age	It refers to the age of user
4	Patient mobile number	It refers to the mobile number of user. This mobile number is used to login into the app
5	Password	It refers to the password that should be used for login into the app
6	Confirm password	It refers to the confirm password that should be same as password.

REGISTRAION SCREEN form contains following **BUTTONS**:

SUBMIT: This button allows to register the new user in app.

3.1.5 Flow

Steps of process flow:

1. Tab on registration link available on Login screen
2. The app displays the registration screen as follows:

1:57 92%

< Registration

Name

Gender
Select your Gender

Age

Patient Mobile Number

Password

Confirm Password

Generate OTP

फ्री में इलाज़ के सपना हमें साकार
अब डॉक्टर मन आगे हमर दुआर

3. Enter/ select the user details
4. Tab on Generate OTP button
5. The app displays the OTP pop-up for entering OTP:

1:57 92%

< Registration OTP sent successfully

6. Enters the OTP
7. Tabs on Verify now button to register the user

3.1.6 Messages

S. No.	Message	Reason	Expected Action from the user
1.	Please enter name	This message indicates that name is not entered before tabbing on Generate OTP button	User should enter the name

2.	Please select gender	This message indicates that gender is not selected before tabbing on Generate OTP button	User should select the gender
3.	Please enter age	This message indicates that age is not entered before tabbing on Generate OTP button	User should enter the age
4.	Please enter patient mobile number	This message indicates that patient mobile number is not entered before tabbing on Generate OTP button	User should enter the patient mobile number
5.	Please enter password	This message indicates that password is not entered before tabbing on Generate OTP button	User should enter the password
6.	Please enter confirm password	This message indicates that confirm password is not entered before tabbing on Generate OTP button	User should enter the confirm password
7.	Confirm password should be same as password	This message indicates that confirm password is not same as password	User should enter the valid confirm password

3.2 Login

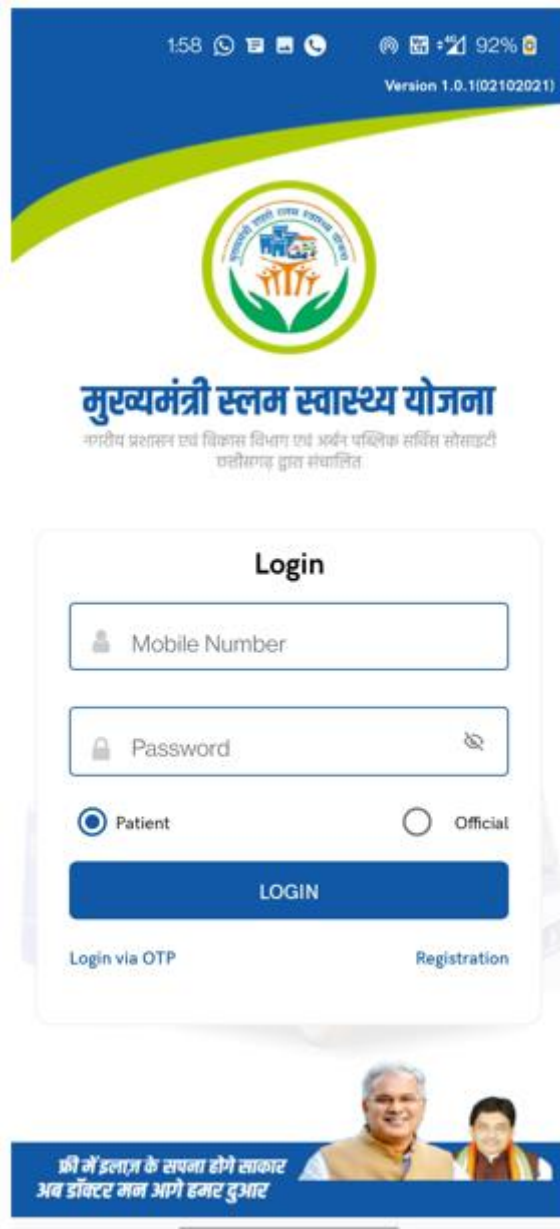

3.2.1 Description

This functionality allows the user to login into the mobile app and access the various functionality assigned to him/ her. User can login into the app via two methods: via password and via OTP. Password should be the same which has been entered while registration. After login into the app, the user can access the functionality based on assigned role.

3.2.2 Prerequisites

1. Mobile app must be installed on the user's mobile
2. User must have valid user credentials
3. Internet connection should be active

3.2.3 Screenshot

3.2.4 Field Description

S. No	Field Name	Description
1	Mobile number	It refers to the username of the user for accessing the mobile app.
2	Password	It refers to the password of the user for accessing the mobile app.
3	Patient or Official	It defines whether the user is logged in as Patient of official
4	OTP	It refers to the OTP sent to user for login when tabs on login via OTP link

LOGIN SCREEN contains following **BUTTON**:

Login: It allows the user to login into the mobile app after entering valid user credentials.

3.2.5 Flow

Steps of process flow:

CASE-1 (“LOGIN VIA PASSWORD”)

1. Tabs on MMUs icon on mobile
2. Enters the mobile number and password
3. Tabs on Login button to login into the mobile app

CASE-2(“LOGIN VIA OTP”)

1. Tabs on MMUs icon on mobile
2. Enters the mobile number
3. Tabs on Login via OTP link
4. Enters the OTP in pop-up
5. Tabs on Verify now button to login into the mobile app

3.2.6 Messages

S. No.	Message	Reason	Expected Action from the user
1.	Please enter mobile number	This message indicates that mobile number has not been entered before tabbing on Login button	User should enter mobile number
2.	Please enter password	This message indicates that password has not been entered before tabbing on Login button	User should enter password
3.	Please enter password	This message indicates that password has not been entered before tabbing on Login button	User should enter password
4.	Incorrect user credentials	This message indicates that the entered user credentials are not correct	User should enter valid user credentials
5.	Incorrect OTP	This message indicates that the entered OTP is not correct	User should enter valid OTP

3.3 Dashboard

3.3.1 Description

This functionality allows the user to view the dashboard of mobile app. It shows the different functionalities assigned to the logged-in user. After tabbing on the respective functionality, the user can access the functionality and perform his/ her activity (s).

3.3.2 Prerequisites

1. User must be logged-in into the app

3.3.3 Screenshot

3.3.4 Field Description

S. No.	Field Name	Description
1	Book appointment	It allows the user to book appointment
2	Appointment status	It allows the user to view history of appointment as well as the option to cancel or reschedule appointment
3	Camp plan	It allows the user to view camp details against selected city
4	Add family member	It allows the user to register family member against logged-in's mobile number
5	OPD history	It allows the user to view the OPD history as well as the option to download cash sheet, prescription and referral.

3.3.5 Flow

Steps of process flow:

1. User logs into the app
2. The app displays the dashboard (**Refer screenshot**)

3.3.6 Messages

N/A

3.4 Display personal information

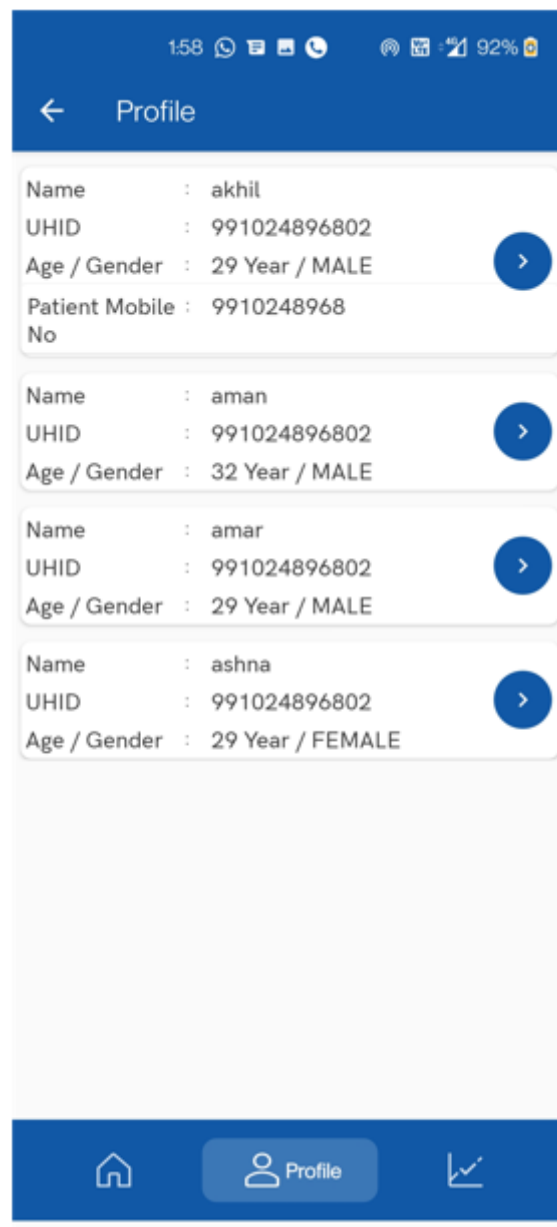

3.4.1 Description

This functionality allows the user to view basic details of the registered user against the entered user credentials. It includes name, UHID No., gender/age and mobile number. It displays the list of all user (s) who are registered against the entered mobile number either through registration process or through add family member screen.

3.4.2 Prerequisites

2. User must be logged-in into the app and is having access to "Personal Information"

3.4.3 Screenshot

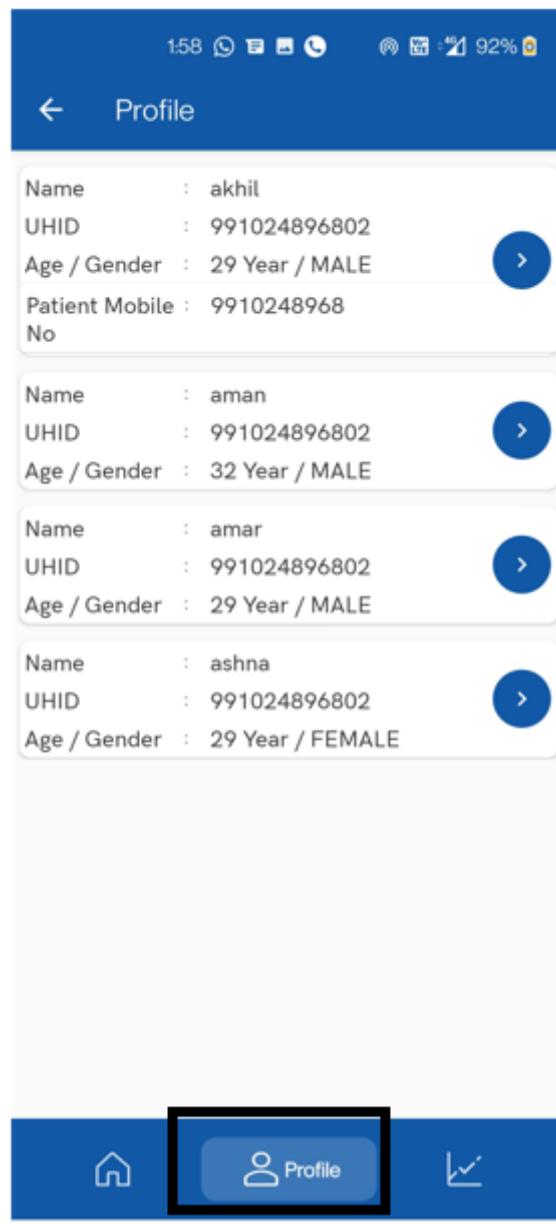

3.4.4 Field Description

S. No.	Field Name	Description
1	Name	It refers to the name of the registered user
2	UHID No.	It refers to a unique system generated number while patient registration
3	Gender/ Age	It refers to the gender and age of the registered user
4	Mobile number	It refers to the mobile number with which the user is logged-in

3.4.5 Flow

Steps of process flow:

3. User tabs on the Profile icon given on bottom of the mobile app as shown below:

4. The system displays the following information of registered member:
 - Name
 - UHID
 - Age/ Gender
 - Mobile number

3.4.6 Messages

N/A

3.5 Book appointment

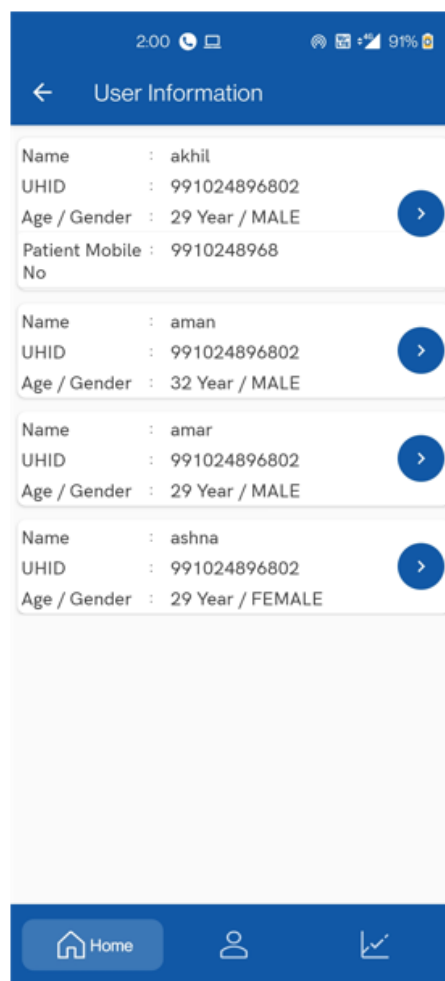

3.5.1 Description

This functionality allows the user to book the appointment based on appointment date, city and camp. Once the appointment is booked, the same is displayed in appointment status or history.

3.5.2 Prerequisites

User must be logged-in into the application and is having access to “Book Appointment”

3.5.3 Screenshot

3.5.4 Field Description

S. No.	Field Name	Description
1	Name	It refers to the name of the patient whose appointment needs to be booked
2	UHID	It refers to the UHID number of patient generate doing registration
3	Age/ Gender	It refers to the age and gender of the patient
5	Patient mobile number	It refers to the mobile number against the patient is registered
6	Appointment date	It refers to the date against the appointment needs to be booked
7	City	It refers to the city against which the appointment needs to be booked
8	Camp	It refers to the camp name against which the appointment needs to be booked. It displays the camp name as well as the current distance between patient location and the selected camp location

This functionality allows the user to add family member against the logged-in' user mobile number. The basic details like name, age, gender are captured. Once the details of user is entered, the family member is registered in the app.

3.10.2 Prerequisites

1. MMU app is installed on user mobile
2. Use should be logged-in into the app and is having access to add family member screen

3.10.3 Screenshot

The screenshot displays the 'Add Family Member' interface. At the top, a blue header bar contains a back arrow and the text 'Add Family Member'. Below this, the form includes:

- A text input field for 'Name' with a person icon on the left.
- A dropdown menu for 'Gender' with the placeholder text 'Select your Gender'.
- A text input field for 'Age' with a calendar icon on the left.
- Three radio buttons labeled 'Yrs', 'Mths', and 'Days' for selecting the unit of age.
- A text input field for 'Mobile Number' with a phone icon on the left and the number '9910248968' entered.
- A blue 'Submit' button at the bottom of the form.

 The bottom of the screen features a blue navigation bar with three icons: a house for 'Home', a person, and a line graph. The very bottom status bar shows the time '7:41' and battery level '85%'.
